## Design & Engineering

- Leading edge product development utilizing industry's latest advanced analysis techniques.
- Comprehensive fatigue, life-cycle and performance testing
- Designed for performance and durability with lifetime, maintenance free, composite bushings throughout
- Compliant with ANSI MH29.1:2012 "Safety Requirements for Industrial Scissor Lifts"

## Safety in Mind

- Meets or exceeds required safety clearances
- Flow limiting safety valve at cylinder
- Contoured scissor legs and large torque tube maximize stiffness and stability
- Hinged maintenance bars powder coated yellow for safety
- Contoured platform corners for operator safety

## Additional Features

- Unitized power unit
- Innovative features including easy-view hydraulic reservoir
- Intuitive and user friendly plug & play controls
- Clean, accessible maintenance friendly design

## Optimus™ Options

- 43" Diameter Turntable Platform
- Foot Operated Controls With Guard
- Accordion Bellows Skirting
- Semi-Live Portability (L2K only)
- Cart Portability With 2 Swivel and 2 Rigid Casters - adds 7" to lowered ht. (L2K & L3K only)
- 480 VAC Motor w/Low Voltage Controls (L3K & L5K only)

43" Diameter Turntable

Foot Control

Accordion Bellows

\*Bishamon On-Demand Group ships in 48 hours or less!

Optimus Lifts Included are:

- L2K-2848
- L2K-3648
- L2K-TT
- L3K-2848 (115 VAC)
- L3K-3648 (115 VAC)
- L5K-3256 (115 VAC)

Adding options may affect delivery. Consult factory to request a copy of the On-Demand program details.

# CompacLift™

X SERIES SCISSOR LIFT TABLES

**Bishamon®**

Bishamon X-Series Scissor Lift Tables are rugged, compact hydraulic lifts with capacities of 440 to 1,650 lbs., travel distance up to 45 in. and platform sizes from 18 x 25.5 to 20 x 40 inches.

X Series CompacLift™ tables are most widely used in machine tool or other production line manufacturing activities requiring heavy-duty lifting and positioning within a confined area. With additional emphasis placed on ergonomics and the reduction of repetitive lifting activities by the manufacturer, The X-Series meets an ever-growing need for lifting assistance.

Basic design features a manual foot pump operation to afford the opportunity of economical solutions to lifting problems. Electric/Hydraulic and Air/Hydraulic units are also available in most capacities.

CompacLifts™ are designed and manufactured to extend the work area of machine tool activities and production lines. They also increase productivity and reduce worker strain by positioning materials at optimum operating heights for worker efficiency.

X Series Lift Tables are available in five capacities, four table sizes and single or double scissors.

All Bishamon Lift Tables are designed and constructed for lifting applications under the toughest working conditions, offering years of trouble-free operation.

C - Manual Foot Pedal Pump

E - Electric / Hydraulic 115V, 1/2HP external power unit assembly with 24VAC control voltage

P - Air / Hydraulic

S - Double Scissors

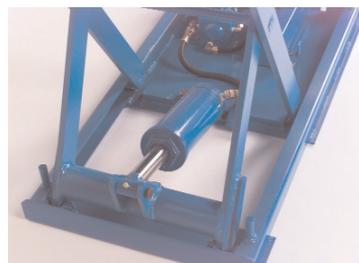

Optional foot pedal switch available on electric models.

### Standard Features

- Compact design
- Manual, electric and air operated models available
- Constructed with heavy-gauge steel and sturdy welds throughout
- Steel work platforms
- Entrapped rollers for increased stability
- Superior hydraulic systems proven on a range of Bishamon lift products
- Hand control on electric models
- Removable & storable operator's foot pedal and lowering control on manual models
- Wide range of table sizes
- Quality baked enamel finish

Removable & storable operator's foot pedal and lowering control on basic models.

# EZ UP<sup>®</sup>

PNEUMATIC LIFT TABLE

## Bishamon<sup>®</sup>

The Bishamon EZ-UP is the ideal lifting and work positioning solution whenever operator control is required and shop air is convenient. Incorporating many of the same advanced ergonomic features as the popular EZ Loader (captive air pallet positioners), the EZ-UP utilizes constant shop air, allowing the operator to position the load for loading or unloading. The integral rotator ring eliminates the need to reach, stretch or walk around the pallet, making the EZ-UP an unsurpassed ergonomic tool that helps increase productivity at your facility. Pneumatic lifts contain no electrical or hydraulic components, and require little maintenance. They provide the ideal tool where cleanliness is a must and where sparks can be hazardous. Lift tables in general position the work closer to the worker, which reduces the risk of injury, worker fatigue, or the chance of damage to sensitive products that are work in process. Typical applications are found in most any manufacturing, processing or distribution facility.

## EZU & EZU-R PNEUMATIC LIFT TABLES

Working Harder To  
Make Your Life Easier

### EZ UP Model EZU-15

### EZ UP Model EZU-15-R

### Standard Features

- Firestone Airstroke Actuator raises and lowers the table platform to vertically position the load to the desired height
- Hand or foot control is standard
- Durable and attractive polyester powder coating adds life and superior corrosion resistance to the finish
- Heavy-duty structural steel construction with rugged base frame
- Entrapped rollers on base and platform for added stability
- Hinged maintenance bars
- Rotating models feature a secured center pivot with ball bearing that provides smooth, even rotation
- High quality 3 position hand lever control allows easy operation
- Clean design with minimum of maintenance needed
- Easily relocated with a fork truck

### Optional Accessories

- Rotator Ring Brake
- Accordion Bellows Skirting
- Semi-Live Portability
- Rotating Platform - Solid Rectangular 44x44 / 44x48 / 48x48
- Pedestal Valve Stand for Hand Control

# LoProfile™

LX SERIES LO-PROFILE LIFT TABLES

**Bishamon**®

The Bishamon LX-Series Lo-Profile™ are rugged electrohydraulic lift tables. They are designed for capacities of 550 lbs. to 4,400 lbs. and are available in a variety of platform sizes and lift heights.

LoProfile™ lift tables provide lifting power from a very low elevation. This low collapsed height provides easy access for pallet jacks, 4 - wheeled carts and other devices requiring low profile. The LoProfile™ is also an excellent choice for conveyor transfer.

LoProfile™ lift tables help increase productivity and reduce worker strain by positioning materials at a convenient operating height for worker efficiency.

LoProfile™ lift tables are widely used in production facilities, assembly areas, shipping and warehousing facilities. With great emphasis being placed on ergonomics and the reduction of repetitive motions, the LX Series meets the ever-growing need for work positioning assistance in manufacturing operations.

All Bishamon products are designed and constructed for positioning applications under the toughest working conditions, offering years of trouble-free operation. They reflect over 55 years of proven Bishamon performance.
